EDUCATION

- Stony Brook University** Stony Brook, NY
Bachelor of Computer Science with Specialization in AI and Data Science Aug 2021 - May 2025

SKILLS SUMMARY

- **Platforms/Frameworks:** Linux, React Native, Flutter, Node.js, Express.js, .NET, Next.js
- **Languages:** Python, Java, C, Typescript, SQL, Dart, Javascript, GraphQL, C#
- **Tool & Technologies:** AWS, Monarch, Docker, Apache Solr, Launchdarkly, Datadog, Octopus Deploy, Figma

EXPERIENCE

- **Associate Software Engineer** New York City, NY
RVO Health July 2025 - Present
 - Architected and led the Healthgrades-wide rollout of Monarch SDK, building unified **A/B testing** and feature-flagging platform that powers experimentation across provider profiles, conversion optimization flows, and dynamic content modules on a platform serving **5M+** daily users.
 - Optimized search engine visibility by resolving **SEO pagination bugs** and decreased incorrect provider image indexing in Google SERPs by about **70%**, enabling more accurate experiment attribution and conversion tracking across profile pages.
 - Engineered GraphQL API fields in **C .NET** and **Solr** to enable self-serve client customization of profile content, eliminating the need for per-client code deployments and reducing engineering overhead.
 - Improved scalability of Healthgrades' provider scheduling pipeline by implementing **negative caching** for invalid third-party providers.
 - Drove a systematic observability rollout across **6** production services by onboarding them to Datadog SLO monitoring, strengthening reliability tracking and incident response capabilities
- **Software Engineering Intern** Remote
SRC Inc. Jan 2025 - June 2025
 - Developed a responsive web-based interface utilizing **React.js** to allow user interaction with electronic warfare systems and sensors for the Autonomous Collaborative Systems (ACS) business unit
- **Software Engineering Intern** Charlotte, NC
RVO Health June 2024 - Aug 2024
 - Resolved **11 frontend issues**, significantly improving Healthgrades' performance. Spearheaded the development of a new group-practice page using React.js, .NET and Java, restructuring the database and enhancing user access to physician practices.
 - **Hosted** stakeholder meetings to gather input from multiple teams, facilitating effective collaboration and project alignment.
- **Data Structures and Algorithms Teaching Assistant** Stony Brook, NY
Stony Brook University Jan 2023 - May 2023
 - Assisted **30+ students** with debugging code, and strengthened understanding of time complexity and data structure concepts.
 - Facilitated 3 review sessions for **100+ students** with a group of teaching assistants to prepare students for Data Structures and Algorithms examinations.
- **Webmaster & Event Committee Chair** Stony Brook, NY
Stony Brook University Feb 2022 - May 2024
 - Developed website with HTML and JavaScript, featuring a user-friendly design and an interactive gallery for showcasing events and resources.
 - Successfully orchestrated and managed over **50+** impactful events focused on promoting women in computer science, fostering inclusivity, and creating a supportive community for female professionals in the field.
- **Full Stack Developer Intern** Remote
Workopti Jul 2022 - Aug 2022
 - Integrated Passport Strategy for authentication, seamlessly linking platforms like Slack, Jira, and Discord, reducing collaboration costs by **45%** for a progressive startup centralizing technology platforms.

PROJECTS

- **SimpleRead Medical:**
Demo: <https://drive.google.com/file/d/1QUZJarXLxocoKgG3Qbj1MfCplbxeeTqp/view>
 - Built a full-stack **RAG** (Retrieval-Augmented Generation) application enabling users to upload medical documents (PDFs) and get complex medical information simplified. Implemented semantic search using **vector embeddings** and real-time streaming chat responses with source citations. Used **Next.js**, **AWS Bedrock** and **LangChain** text splitters.
